PROFILE INFO

I am a passionate and results-oriented MCA student with strong interest in software development and web technologies. I have hands-on experience in building projects using Python, Flask, and databases like MongoDB. I am eager to apply my technical and problem-solving skills to develop efficient and scalable applications.

EDUCATION

2025 -2027

SAPTHAGIRI NPS UNIVERSITY

Master of Computer Applications
CGPA :

2022 -2025

IMJ INSTITUTE OF SCIENCE AND
COMMERCE

Bachelor of Computer Applications
CGPA : 8.18

SKILLS

- Cybersecurity basics
- UX Designer
- Debugger
- Data Structures & Algorithms
- Mobile App Development

LANGUAGES

- Python Programming
- Java Programming
- C++ Programming
- Data Structures & Algorithms
- Database Management Systems
- Computer Networks

SOFT-SKILLS

- Communication
- Leadership
- Problem-solving
- Problem-solving

PROJECT

FitBe - Fitness Website

Developed a responsive fitness web application using Python, HTML, CSS, and JavaScript to help users track workouts and maintain a healthy lifestyle. Implemented features like workout plans, user registration/login, and interactive UI for better user experience.

Reader's Wish - Online Book Store

Built a dynamic online bookstore using Python, HTML, CSS, and JavaScript, allowing users to browse, search, and purchase books. Integrated user-friendly navigation, book categorization, and basic cart functionality to enhance usability.

Airline Management System

Designed and developed a web-based airline management system using PHP, HTML, CSS, and JavaScript. The system manages flight schedules, ticket booking, passenger details, and admin operations with an efficient and structured interface.

CERTIFICATE

Cyber Security

Learned fundamentals of network security, cryptography, and basic techniques to identify and prevent cyber threats.

Business Analytics with Excel

Gained skills in data analysis, visualization, and decision-making using Excel tools like pivot tables and formulas.

SQL Analytics and BI on Databricks

Learned to perform data analysis using SQL and build business intelligence insights on the Databricks platform.

Machine Learning Using Python

Learned core machine learning concepts and implemented models using Python libraries for data analysis and prediction.

EXTRACURRICULAR ACTIVITIES

M. S. Ramaiah College of Arts, Science and Commerce

Participated in an inter-college hackathon, collaborating with team members to solve real-world problem statements. Applied problem-solving, technical implementation, and presentation skills under time constraints.

ABBS Autonomous College

Worked on innovative solution development and presented project ideas to mentors and evaluators. Strengthened teamwork, coding, and project development experience in a competitive environment.
