Professional Summary

Results-driven MCA student skilled in Java, Python, and the MERN stack, with hands-on experience building full-stack applications. Demonstrated leadership in team projects and hackathons, with strong problem-solving and debugging skills under tight deadlines. Adept at handling critical, time-sensitive situations with a hardworking, ownership-driven approach

Education

Sapthagiri NPS University

Master of Computer Applications (MCA) — CGPA: 9.09

2025 – 2027

Bengaluru, Karnataka

IMJ Institute of Science and Commerce

Bachelor of Computer Applications (BCA) — CGPA: 8.18

2022 – 2025

Kundapur, Karnataka

Projects

NaviPulse — Python, HTML, CSS, SQL

2026

- Developed a travel and navigation platform integrating live flight status, railway schedules, and real-time traffic updates using Python, HTML, CSS, and SQL.
- Built a centralized, interactive web application to simplify multi-source transportation data into a single user-friendly interface, enhancing accessibility and user experience.

NewsSphere — MongoDB, Express.js, React.js, Node.js

2026

- Developed a MERN full-stack news platform inspired by Dailyhunt, enabling users to discover and read the latest news across multiple categories through a responsive and user-friendly interface.
- Implemented dynamic news fetching, category-based browsing, search functionality, and RESTful APIs using React.js, Node.js, Express.js, and MongoDB for efficient content management and delivery.

Velora AI Healthcare — Java, React.js, Three.js, MongoDB, U-Net, LLM, RAG

2026

- Developed an AI-powered healthcare platform with interactive **3D human anatomy**, medical-image analysis, and an AI chatbot for personalized health assistance.
- Implemented **CNN/EfficientNet** for disease classification, **U-Net** for medical-image segmentation, and **RAG-based LLM** for contextual healthcare responses.
- Achieved **92.4% Accuracy, 91.8% Precision, 90.7% Recall, and 91.2% F1-score** on the evaluated medical-image dataset.

Technical Skills

Programming Languages: Java, Python, JavaScript

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, NumPy, Pandas

Databases: MySQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, Docker, AWS, Postman

Data & Analytics Tools: Excel, Tableau, Power BI

Web Technologies: REST APIs, ES6, HTML5, CSS3

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Web Development

Certifications

- **SQL Analytics and BI on Databricks** – Simplilearn – SQL-based data analysis and business intelligence.
- **Machine Learning Using Python** – Simplilearn – Core machine learning concepts and model implementation using Python.

Extracurricular Activities

- **ABBS Autonomous College** – Won the project competition for innovative solution development and presentation, demonstrating strong teamwork, coding, problem-solving, and project development skills.
- **Inter-College Hackathon, M.S. Ramaiah College** – Collaborated with a team to solve real-world problem statements under time pressure, applying technical implementation and presentation skills.
- **IEEE Research Paper Publication** – Published the research paper “*Designing for the Storage Hierarchy: Tier-Awareness in PolarStore’s Compression Engine and ByteHouse’s CrossCache*”, focusing on storage hierarchy optimization, compression engines, and cache-aware data management.
